Embraer selects Cobham Aerospace Communications for the C-390

Embraer has selected Cobham Aerospace Communications for the next generation audio communication system of the multirole military transport C-390. Cobham Aerospace Communications will supply the system that manages the communications of the flight deck, both internal to the aircraft (with the crew) and external to the aircraft (through existing radios).

This system features full compliance with NATO requirements, as well as highly secure wireless functions, together with significant weight savings and enhanced reliability compared with traditional technologies.

Rabah Bouda, Cobham Aerospace Communications' SVP Engineering, said "We are proud of our very close relationship with Embraer's engineering teams. Together we have come up with a highly efficient system that enable the aircraft to accomplish new missions."

Yves Ambiehl, Cobham Aerospace Communications' SVP Marketing & Sales, commented, "this new contract comes as one additional element to the array of solutions that we supply to Embraer's product range. We are convinced that this technology will contribute to the success of Embraer's products on the market".

About Embraer

A global aerospace company headquartered in Brazil, Embraer has businesses in Commercial and Executive aviation, Defense & Security and Agricultural Aviation. The company designs, develops, manufactures, and markets aircraft and systems, providing Services & Support to customers after-sales.

Since it was founded in 1969, Embraer has delivered more than 8,000 aircraft. On average, about every 10 seconds an aircraft manufactured by Embraer takes off somewhere in the world, transporting over 145 million passengers a year.

Embraer is the leading manufacturer of commercial jets up to 150 seats and the main exporter of high value-added goods in Brazil. The company maintains industrial units, offices, service, and parts distribution centers, among other activities, across the Americas, Africa, Asia and Europe.

About Cobham Aerospace Communications

Cobham Aerospace Communications is a leading supplier of airborne avionics systems in the fields of satellite communications, audio/radio management, antennas, lights, clocks, and man-machine interfaces. We are an international company with headquarters in Rungis (Paris), France, and operate multiple sites in France, the United States, Canada, South Africa, and Denmark, with sales offices in Singapore, China and India. Through its unique technologies, Cobham Aerospace Communications has established strong and long-standing partnerships with many of the world's leading manufacturers of commercial and regional aircraft; business jets; general aviation aircraft; military trainer, transport, and fighter aircraft; helicopters; and UAVs.
