

## **Lufthansa Technik selects Thales for the Pegasus program**

© Bombardier

**Lufthansa Technik has selected Thales for the audio/radio communication system of Germany's next-generation Signal Intelligence Surveillance and Reconnaissance aircraft. The program is led by German sensor solutions specialist HENSOLDT.**

Thales will supply its last generation of secured audio/radio management system capable of managing the communications of the flight deck and operators both internally and externally to the aircraft.

This system features full compliance with German military requirements, the highest level of security, and significant weight savings, as well as enhanced reliability compared to traditional technologies.

*"Lufthansa Technik's and Thales Aerospace Communications' engineering teams have worked very closely to develop the most adapted audio/radio management system for this program. Together we have come up with a highly efficient system that enables the aircraft to fulfill very demanding missions. This new contract confirms our market leadership in terms of audio/radio management systems for missionized single intelligence platforms."* **Nicolas Bonleux, Executive Vice-President, Thales Aerospace Communications.**

## About Thales

Thales (Euronext Paris: HO) is a global leader in advanced technologies specialized in three business domains: Defence & Security, Aeronautics & Space, and Cybersecurity & Digital identity.

It develops products and solutions that help make the world safer, greener and more inclusive.

The Group invests close to €4 billion a year in Research & Development, particularly in key innovation areas such as AI, cybersecurity, quantum technologies, cloud technologies and 6G.

Thales has close to 81,000 employees in 68 countries. In 2023, the Group generated sales of €18.4 billion.

## About Lufthansa Technik

The Lufthansa Technik Group is one of the leading providers of technical aircraft services in the world. Certified internationally as maintenance, production and design organization, the company employs more than 23,000 people in dozens of locations around the globe. Lufthansa Technik offers the full range of services for commercial, VIP and special mission aircraft. The portfolio includes maintenance, repair, overhaul and modification of airframes, engines, components and landing gears, as well as the manufacture of innovative cabin products and digital fleet support.
